

DMS-22 23-156 Content Delivery Network (CDN) Solution

Connect and Protect critical web infrastructure across the State of Florida

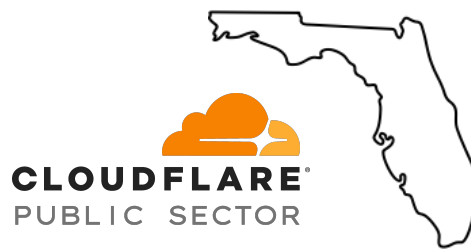

What is Cloudflare?

Cloudflare delivers a global, highly resilient network that enhances security, performance and reliability of any Internet-connected application or service.

What is covered under DMS-22 23-156 FL[DS] Contract?

Content Delivery Network Solution Including Critical Security Components

- Managed DNS
- Certificate Management
- DDoS Protection
- Web Application Firewall
- Bot Management
- Load Balancing
- FedRAMP

Implementation, Training and Onboarding Included

Security and performance for government agencies

One network – everywhere

Agencies benefit from a network **built to run every edge service on every server – globally.**

There are **no tradeoffs between security and performance** because all **customer traffic is processed at the data center closest to its source.**

Compliance & privacy – built-in

Cloudflare for Government has achieved **FedRAMP Moderate** Authorization.

Our Data Localization Suite provides **granular controls** on where data is inspected to **ease compliance burdens** and **protect government agencies.**

Resilient & future-proof network

Agencies value a **uniform and composable platform** for **easy setup and operations** without the cost or complexity of legacy network hardware.

We offer **100% uptime reliability**, with support for **Encrypted DNS, IPv6, TLS 1.3**, and more.

Start your journey to a faster, more reliable, more secure network

What makes Cloudflare different?

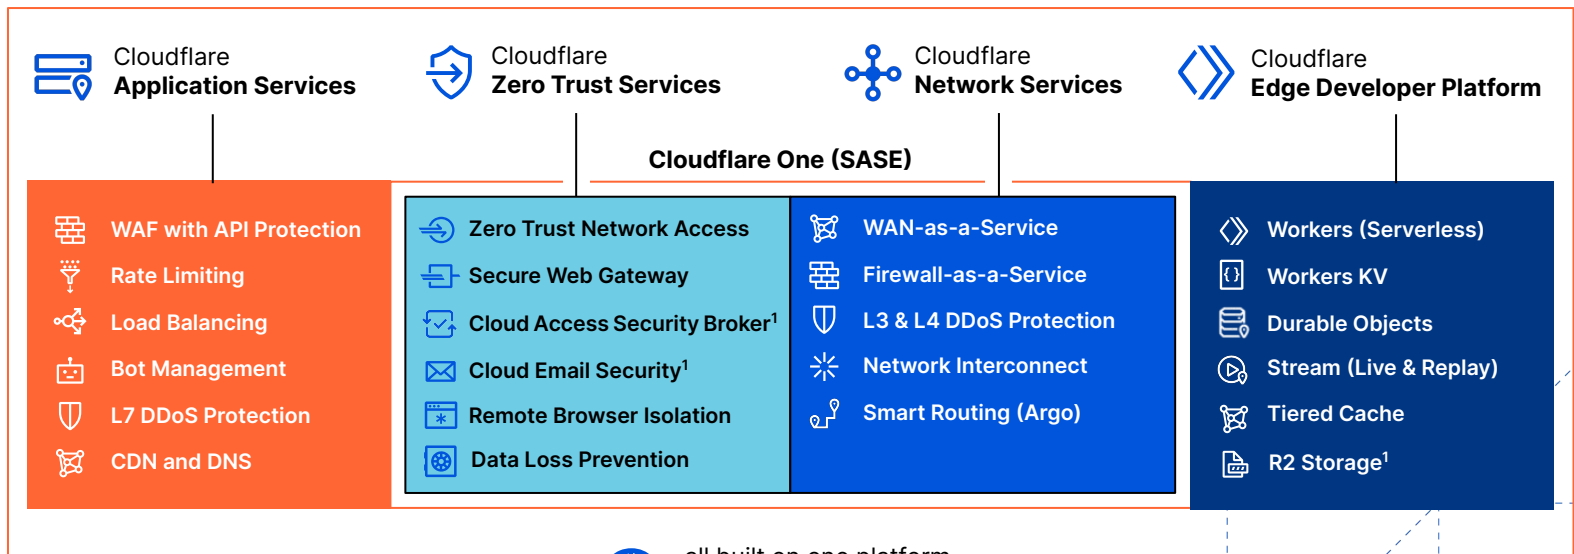

The Cloudflare global network **runs every service in every data center, providing a consistent experience everywhere.** With Fedramp/StateRAMP Controlled US traffic including 45+ US and 3 Florida Network Points of Presence (**Miami, Tampa, Tallahassee**).

This makes your network:

- **more resilient** – no need to pick a region; all locations are in scope
- **easier to deploy & manage** – deploy services in minutes not months
- **adaptable to evolving technical requirements** – IPv6, DoH, PQC

Cloudflare for Government - FedRAMP Moderate Services - Complete Portfolio

all built on one platform
Cloudflare **Global Network**

- Global Edge:** 485+ PoPs, 95% of population within 50ms, 11,000+ interconnects, 192 Tbps capacity
- Building Blocks:** SSL/TLS, mTLS, Authoritative/Recursive DNS, DNSSEC, DNS over HTTP, IPv6, Anycast Network
- Compliance/Privacy:** FedRAMP, ISO, SOC, PCI, GDPR-compliant, Logs & Analytics, Data Localization

¹ Future FedRAMP inclusion, due to recent inclusion (updated Nov 2022)
