**N-Central Remote Monitoring and Management Tool. Includes Implementation, Training, Integration, Maintenance, and Support.
Optional - 24/7 Management by U.S. SOC Team**

Get easier IT management with N-central RMM, a comprehensive **Remote Monitoring and Management** solution designed to automate, monitor, manage, and secure all your environments at scale, all while being supported by our **24/7 Security Operations Center (SOC).** N-central RMM provides full visibility into your entire IT network - every device, every OS, both on-premises and in the cloud - freeing you from barriers that limit your ability to manage and view your systems.

Our tool enables you to easily monitor clients, ensure reliability, and view your **security posture**. You'll be able to deliver OS and feature upgrades and do installations from our extensive catalogue of third-party apps, **all without the need for scripting**. You can also use your own installers or scripts. Schedule or make on-demand patches in any network environment with unmatched reboot control. Our 24/7 SOC provides alerts, security, reliability, and support!

While we have a 24/7 team to manage and support you, we offer you the flexibility to automate your way, using your original code, some code, or even no code at all. This means that you can scale automation effortlessly, apply granular rules deployment across all devices and users, and handpick **best-in-class reporting and integrations** without worrying about vendor lock-in. Everything is accessible through a **single pane of glass**. Or you can just ask our 24/7 team for what you are looking to see or accomplish. You are in control.

Our tool allows you to gain deep visibility and monitoring across all your supported **Windows, MacOS, and Linux devices.** Designed to scale to thousands of devices (and more), N-central RMM empowers your team to create precise filters and views, effectively cutting through the noise to deliver actionable insights. Moreover, our **platform is device-agnostic**, allowing you to monitor and manage a range of network devices securely and efficiently.

We prioritize speed and ease of integration, allowing quick integration with **Microsoft Intune, Meraki, Office 365, AWS, VMware, Microsoft Azure, and more**. Coupled with our intuitive drag-and-drop UI and a library of 650+ pre-made scripts, automation is made fast and straightforward. If you need help, or want someone else to do it for you, just call our 24/7 team.

All our RMM scripts are available for use to download and customize, paving the way for unique automation that suits your specific service delivery. Beyond our cutting-edge tools and resources, N-central RMM brings proven expertise to the table. Our 24/7 support team and SOC, coupled with robust training sessions, boot camps, webinars, and pre-made deployments/scripts, ensure you are never left unsupported. N-central RMM will enhance your reliability, visibility, and operability of your IT network and systems.
